Press Release

CERC proposes amendments to tariff regulations

Central Electricity Regulatory Commission has invited comments from the stakeholders on its proposal to carry out amendments to the terms and conditions of tariff for the period 2004-09 on the following issues:

- Simplification of procedure for filing application for provisional tariff
- Rate at which energy shall be sold by a generating station during the period of its trial operation i.e. between first synchronization with the grid and declaration of commercial operation. Adjustment of additional revenue thereof for reducing the capital cost of the project.
- Providing operational flexibility to hydro generating stations to enable them to respond to changes in grid frequency.

The draft amendments along with their reasons have been posted on the website: <http://cercind.gov.in>. Last date for sending comments is 16th November 2007.
