Dated: 01.05.2013

To

All Designated ISTS Customers, ISTS Licensees and RPCs

Subject: Submission of network and node wise load/generation data for computation of PoC for 2nd quarter of the year 2013 – 2014 (July - September 2013) for implementation of CERC (Sharing of Inter-State Transmission Charges and Losses), 2010

Sir,

During the 3rd meeting of the Validation Committee on 30.4.2013, Implementing Agency intimated that only a few DICs had submitted the Technical Data for PoC Computation for new assets.

As the State network has been undergoing major updation and new assets have been added to the State Network, it is necessary that the same may be submitted for updating the PoC Base Case and arriving at realistic results. Thus, it was decided that the DICs would submit updated network data and node-wise load / generation data for PoC Computation latest by 6th May 2013.

In order to facilitate the computation of PoC Charges and Losses for the period Jul' 13-Sep'13, it is requested to furnish the following data to the Implementing Agency :

- i. Technical Details of new Transmission elements and Generating Units which are expected to be commercial from July 2013 to September 2013 (As per Format II).
- ii. Nodal Generation information and forecast Withdrawal Data (As per Format III), if yet not submitted.

The detailed data formats for the data submission are available on the website of Implementing Agency i.e. NLDC in MS Excel format and may be download from the following link:

<http://www.nldc.in/IA1/IAformats.aspx>

Filled up formats may be sent in soft in soft copy to NLDC through E-mail to **implementingagency@powergridindia.com**. A written communication confirming the furnishing of data by e-mail to NLDC may also be sent with a copy to CERC.
