Return on Equity (RoE)

18. The Petitioner has submitted that its income tax assessment has been completed and assessment orders have been issued by the Income Tax Department for the FY 2019-20 and the FY 2020-21, and the income has been assessed under MAT [115JB of the Income Tax Act, 1961 (IT Act, 1961)]. The Petitioner has further submitted that the Income Tax Returns (ITR) have been filed for the FY 2021-22 and 2022-23. The Income Tax Returns for the FY 2023-24 will be filed in due course.

19. The Petitioner has also submitted that it is liable to pay income tax at the MAT rates (17.472, i.e., 15% Income Tax + 12% Surcharge on Income Tax=4% Health and Education Cess on Income Tax and Surcharge) and has claimed the following effective tax rates for the 2019-24 tariff period:

Year	Claimed effective tax rate (in %)	Grossed up RoE (in %) [(Base Rate)/(1-t)]
2019-20	17.472	18.782
2020-21	17.472	18.782
2021-22	17.472	18.782
2022-23	17.472	18.782
2023-24	17.472	18.782

20. We have considered the Petitioner's submissions and have also gone through the record. We have noted that the entities covered under the MAT regime are paying Income Tax as per the MAT rates notified for the respective financial year under the IT Act, 1961, which is levied on the book profit of the entity computed as per Section 115 JB of the IT Act, 1961. Section 115 JB (2) defines book profit as net profit in the Statement of Profit and Loss prepared in accordance with Schedule III of the Companies Act, 2013, subject to some additions and deductions as mentioned in the IT Act, 1961. Since, the Petitioner has been paying income tax on income computed under Section 115JB of the IT Act, 1961, as per the MAT rates of the respective financial year, the notified MAT rates for the respective financial year will be considered as an effective tax rate for the purpose of grossing up of the RoE for truing up of transmission tariff for the 2019-24 tariff period in terms of the

provisions of the 2019 Tariff Regulations. Interest imposed on any additional income tax demand as per the Assessment Order of the Income Tax Authorities will be considered on the actual payment. However, the penalty (for default on the part of the Assessee), if any, imposed will not be taken into account for the purpose of grossing up of the rate of RoE. Any under-recovery or over-recovery of the grossed-up rates on the RoE after truing up shall be recovered or refunded to the beneficiaries or the long-term transmission customers, as the case may be on a year-to-year basis. Therefore, the following effective tax rate based on the notified MAT rates are considered for the purpose of grossing up of the rate of RoE:

Year	Notified MAT rates (in %) (inclusive of surcharge & cess)	Effective tax (in %)	Base rate of RoE (in %)	Grossed-up RoE [(Base Rate)/(1-t)] (in%)
2019-20	17.472	17.472	15.50	18.782
2020-21	17.472	17.472	15.50	18.782
2021-22	17.472	17.472	15.50	18.782
2022-23	17.472	17.472	15.50	18.782
2023-24	17.472	17.472	15.50	18.782

21. Accordingly, the trued-up RoE allowed in respect of the transmission asset for the 2019-24 tariff period is as follows:

		(₹ in lakh)
